🤊 Tallinn, Estonia

My focus lies in crafting impactful and user centric design experiences. I took the lead in migrating the company to Figma while establishing and managing an effective design system. Noteworthy achievements include a track record of achieving a 95% satisfaction rate across 11 projects in last years, optimizing a private banking website, resulting in a 17% revenue growth, and collaborating on a new platform for a LaaS company, which drove a remarkable 47% increase in annual revenue.
